Customer Journey Map

Illustrative journey for a user exploring EV market performance through the Tableau dashboard.

Journey phase	Stage 1: Discover need	Stage 2: Explore dashboard	Stage 3: Interpret & decide
Actions	Identifies a need to compare EV manufacturers, models and market performance.	Opens the dashboard; reviews sales, range, price, battery and rating charts.	Compares findings and identifies manufacturers, categories or trends for further investigation.
Touchpoints	Project link, Tableau Public page, dashboard title and overview.	Eight dashboard views, chart titles, axes, legends, map and plotted data.	Visual comparisons, displayed values and shareable dashboard link.
Customer thought	“Where can I find a consolidated view of EV market indicators?”	“Which manufacturers and vehicle categories stand out?”	“What do these comparisons suggest, and what should I investigate next?”
Customer feeling	Curious, but unsure where to begin.	More informed; may need time to interpret multiple measures.	More confident when the charts are clear and comparisons are easy to follow.
Process ownership	Project analyst / dashboard publisher.	Dashboard creator and Tableau Public.	Dashboard user, supported by the analyst’s clear labels and definitions.
Opportunities	Provide a concise project description and clear dashboard entry point.	Use readable titles, units, legends and consistent formatting; explain metric definitions.	Add documented data source, refresh date and interpretation notes; avoid implying causation from correlations.
